WIRELESS SERVICES CANNOT BE FULLY SUPPORTED IN THE PRESENCE OF INTERFERENCE

Our wireless system is compatible with 802.11a/g/n, however to ensure you have the best and most efficient experience with our wireless network please make sure you use a device that operates on the 5GHz frequency (802.11a/n), as this is less affected by the type of interference found in an exhibition space.

Wireless Acknowledgment

(orders will not be accepted without an authorised signature below)

- ExCeL London deliver wireless network services (Wi-Fi) using our leading-edge infrastructure. We deliver the very best possible wireless connectivity, given the prevailing environmental conditions throughout the venue.
- All wireless services, regardless of location or service provider, are susceptible to Interference. This can lead to loss of connectivity, slow network traffic and poor performance.
- Currently, wireless technology is not capable of providing a guaranteed level of service (without a strictly enforced policy that maintains a clean airspace) in a challenging event environment which is affected by sources of interference that vary from event to event.
- Wireless services cannot be fully supported in the presence of interference.
- We will ensure that all of the ExCeL London wireless infrastructure is fully functioning, but cannot support beyond this point.
- Alternative fully-supported, cabled services are available from our standard order form.

I acknowledge and accept that any ordered wireless services are subject to interference and cannot be fully supported. Refunds will not be considered due to the effect of interference.
